SX luminaire series

COMPACT AND POWERFUL CEILING LUMINAIRES.

The new Intara SX boasts innovative functions and design. With its minimal dimensions it offers maximum flexibility.

It features patented precision optics for precise light distributions, optimum glare control for efficient visual comfort, modern driver technologies for sophisticated and comfortable light management and LEDs with spectrums close to natural light.

Thanks to its numerous innovative features, the SX luminaire series is the ideal instrument for shop lighting, but also for lighting solutions in restaurants, hotels and many other architectural sectors.

SX PRODUCT FEATURES

3 WATTAGES*
7 W . 17 W . 23 W

* Depending on the type of luminaire

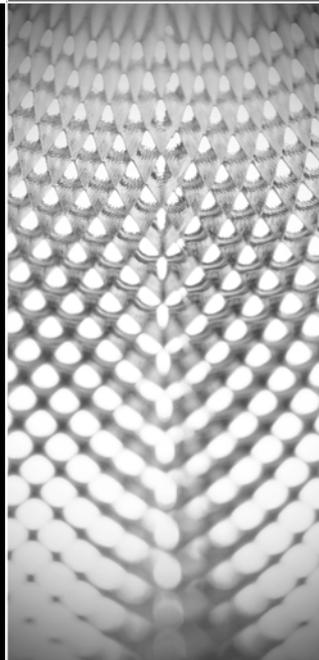

5 LIGHT COLOURS
927 . 930 . 935 . 940
BeNature

4 light distributions
Flood 40°
WideFlood 60°
Downlight 60° (Intara only)
WallWash

EFFICIENCIES
Luminaire luminous fluxes up to 1,760 lm
Luminous efficacy up to 77 lm/W
(for 940, 23 W WideFlood / WallWash)

3 CONTROL METHODS
On/Off
DALI
Casambi

ACCESSORIES
(INTARA RECESSED LUMINAIRE ONLY)
Through-wiring set
Concrete installation housing

ON REQUEST ALSO DIGITAL
AND WIRELESS.

The electronic ballasts of the SX luminaire series meet the requirements for future-proof applications. In addition to the DALI 2 interface, digital control via Casambi Bluetooth Low Energy (BLE) is available.

This means that recessed luminaires in the SX series can be controlled wirelessly, individually or in groups, and integrated into Bluetooth mesh networks – for unlimited convenient and creative lighting scenarios.

Ontero SX

LOW-KEY DESIGN, POWERFUL ACCENTS.

The filigree design of the luminaire blends seamlessly into every kind of ceiling and skilfully directs attention to the presentation area.

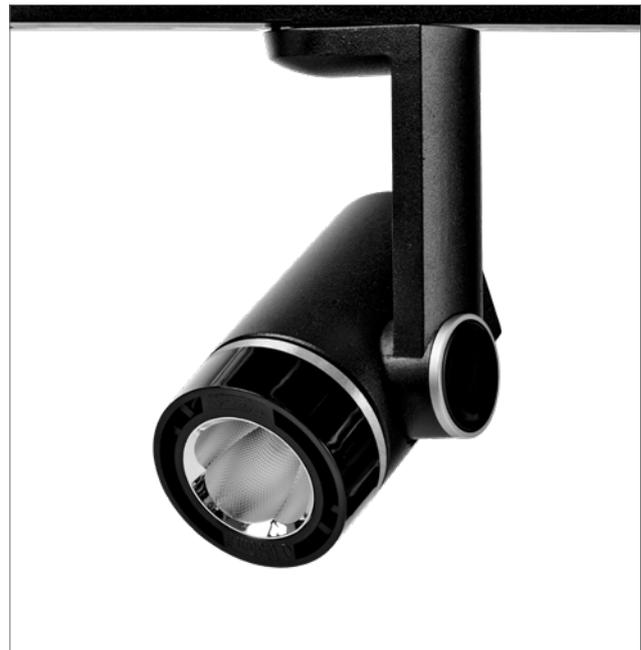

Ontero SX

Surface-mounted luminaire

COLOUR CODE	927	930	935	940
Luminaire luminous flux [lm]	1.500	1.530	1.620	1.660
System power [W]	23	23	23	23

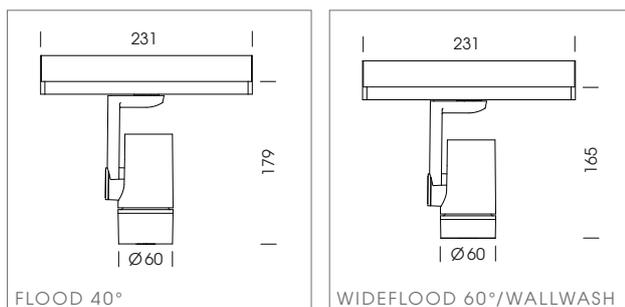

COLOUR SPECTRUM	BeNature
Luminaire luminous flux [lm]	530
System power [W]	17

- Available wattages: 17 W, 23 W (On/Off, DALI, Casambi)
- Available reflectors: Flood 40°, WideFlood 60°, WallWash
- The maximum system power and the resulting luminaire luminous fluxes for the Flood 40° reflector are given.
- All data are typical values. System features may change with product improvements due to technical advances.

ONTERO SX WIDEFLOOD 60° REFLECTOR

Surface-mounted luminaire for tracks, black or white, rated LED lamp lifetime L80/B10 > 50,000 h, colour rendering index CRI > 90, chromaticity point tolerance 2 SDCM (initial), miniaturised, metallised plastic reflector, microfaceted, patented free-form optics (Bartenbach®) with a brilliant and precise light distribution pattern, black, high-gloss reflector support in plastic, supporting reflector ring with threaded connection and air inlet, die-cast aluminium, silver, luminaire housing designed as cooling element, housing and supporting arm in die-cast aluminium, powder-coated, arm cover in housing colour with decorative ring, silver edge, rear perforated plate cover for housing ventilation, matt black, pivot angle 360°, angle of adjustment ±90°, intrack adapter with driver, camera-compatible, up to 2.5 KV interference resistance, choice of On/Off, DALI (OneTrack) or Casambi, 220-240 V~/50-60 Hz, protection rating IP20, protection class II, weight 0.56 kg

The luminaire luminous flux specifications vary within a tolerance range of ± 10%. Further information and light distribution curves from page 16.

Intara SX

FLEXIBLE APPLICATION, PRECISE LIGHT.

The pivot angle of 360° and the angle of adjustment of 90° guarantee maximum flexibility for every application so that product changes can be effortlessly implemented.

Intara SX

Semi-recessed luminaire

Available
in
2023

COLOUR CODE	927	930	935	940
Luminaire luminous flux [lm]	1.500	1.530	1.620	1.660
System power [W]	23	23	23	23

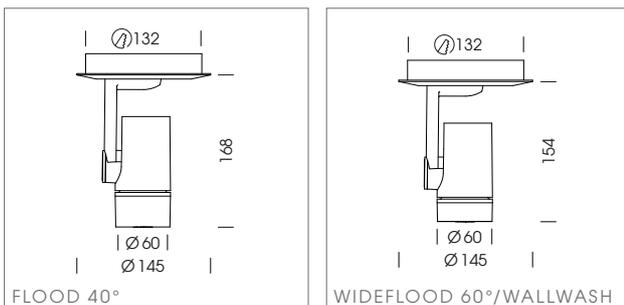

COLOUR SPECTRUM	BeNature
Luminaire luminous flux [lm]	670
System power [W]	23

- Available wattages: 17 W, 23 W (On/Off, DALI, Casambi)
- Available reflectors: Flood 40°, WideFlood 60°, WallWash
- The maximum system power and the resulting luminaire luminous fluxes for the Flood 40° reflector are given.
- All data are typical values. System features may change with product improvements due to technical advances.

INTARA SX 40°-FLOOD REFLECTOR

Semi-recessed luminaire with ceiling canopy, black or white, rated LED lamp lifetime L80/B10 > 50,000 h, colour rendering index CRI > 90, chromaticity point tolerance 2 SDCM (initial), miniaturised, metallised plastic reflector, microfaceted, patented free-form optics (Bartenbach®) with a brilliant and precise light distribution pattern, black, high-gloss reflector support in plastic, supporting reflector ring with threaded connection and air inlet, die-cast aluminium, silver, luminaire housing designed as cooling element, housing and supporting arm in die-cast aluminium, powder-coated, arm cover in housing colour with decorative ring, silver edge, rear perforated plate cover for housing ventilation, ceiling canopy die-cast aluminium, pivot angle 360°, angle of adjustment ±90°, including fixed driver unit, camera compatible, up to 2.5 KV interference resistance, choice of On/Off, DALI or Casambi, 220-240 V~/50-60 Hz, protection rating IP20, protection class II, weight 0.64 kg

The luminaire luminous flux specifications vary within a tolerance range of ± 10%. Further information and light distribution curves from page 16.

Intara SX

HIGH STANDARDS, BRILLIANT SOLUTION.

The small, minimalist recessed luminaire is ideal for precise accent lighting. The unique free-form optics produce a brilliant and precise light distribution pattern.

Intara SX

Recessed luminaire

COLOUR CODE	927	930	935	940

COLOUR SPECTRUM	BeNature
Luminaire luminous flux [lm]	530
System power [W]	17

- Available wattages: 7W, 17W, 23W (On/Off, DALI, Casambi)
- Available reflectors: Flood 40°, WideFlood 60°, Downlight 60°, WallWash
- The maximum system power and the resulting luminaire luminous fluxes for the Flood 40° reflector are given.
- All data are typical values. System features may change with product improvements due to technical advances.

INTARA SX 40°-FLOOD REFLECTOR

Recessed luminaire, black or white, rated LED lamp lifetime L80/B10 > 50,000 h, colour rendering index CRI > 90, chromaticity point tolerance 2 SDCM (initial), miniaturised metalised plastic reflector, microfaceted, patented free-form optics (Bartenbach®) with brilliant, precise light distribution pattern, cooling element die-cast aluminium, anodised red, die-cast aluminium mounting ring, powder coated, pivot angle 220°, adjustment angle ±20°, clamping springs for ceiling mounting, including fixed driver unit, camera compatible, up to 2.5 KV interference resistance, choice of On/Off, DALI or Casambi, 220-240 V~/50-60 Hz, protection category IP 20, protection class II, weight 0.5 kg

The luminaire luminous flux specifications vary within a tolerance range of ± 10%. Further information and light distribution curves from page 16.

We believe that there is a difference between lighting and light. And that light has the power to touch people, to inspire them and to activate them. With this conviction – and decades of experience – we develop unique BÄRO special light colours.

This means that there is not one light for everything. But precisely the right light for every individual requirement – so that every product is shown in the best light.

BÄRO. The Colour *of* Light.

In the right light

THE COLOUR-INTENSIFYING SPECTRUMS OF THE SX SERIES

Light that optimises the natural colours of products is one of the most effective, but also one of the most sophisticated tools of retail lighting. Thanks to decades of experience, BÄRO has the corresponding products, technologies and the necessary expertise.

Light creates an atmosphere – and it supports the sales-promoting presentation of all kinds of products. From fresh foodstuffs to non-food products, fashion and leisure articles – lighting with a coordinated spectral composition can render the colour, material and surface properties of products in a way that shows them off to best advantage to customers. Successful retail lighting must always strike a balance between technical effectiveness, economic efficiency and customer-oriented emotionality.

For example, in a boutique you see shoes in the new colours of the season. Their colour impression depends on several factors at this moment: an arti-

ficial light source illuminates the shoes with white light with a certain spectral composition, which rarely corresponds to the continuous spectrum of sunlight. On the other hand the surface of the shoes absorbs part of this light spectrum while reflecting other components of the light. These catch the eye where sensory cells measure the blue, green and red components of the light and convey them to the visual centre of the brain. Ultimately, a subjective colour impression is created.

As not the whole spectrum, but only three selective colour bands are measured and processed by the brain, the metamerism phenomenon occurs: light with a different composition can

produce the same colour impression for the viewer – and body colours that looked the same under certain lighting may differ greatly under different light.

For product illumination this means: if artificial light spectrums can be technically influenced, the perception of certain colour shades typical to products can be changed in a surprisingly wide range. Depending on the lighting the colour of the shoes can appear warmer or cooler, more or less saturated. The art of product lighting that optimises the products' own colours is to find light spectrums tailored to every application. BÄRO has been a trailblazer in this art for many years.

"LED technology offers numerous starting points for defining light spectrums."

Here the experience with special light colours that BÄRO has acquired over many years and successfully transferred to LED technology is decisive. LEDs offers numerous starting points for defining and influencing light spectrums. BÄRO has developed a wide range of LED light colours in close cooperation with its technology partners. It is divided into standard light colours, colour-intensifying light colours and product-specific light colours to meet different requirements. Even the range of standard light colours that is oriented to the black body line is wider than usual: with the four white tones 927, 830, 835 and 840 it comprises

colour temperatures from a warm 2,700K to a neutral-cool 4,000 K.

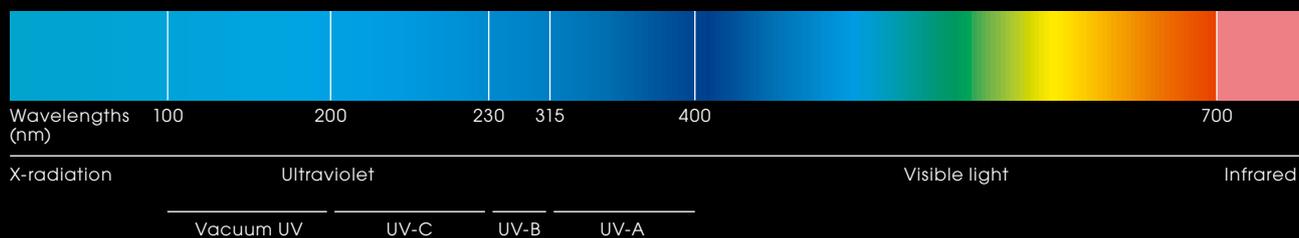

As special light colours the colour-intensifying LED spectrums from BÄRO are also available for the SX series. Their chromaticity points are below the black body line; they make white shine cleanly and colours appear vibrant. PearlWhite saturates yellow and orange surfaces particularly well. BeColor particularly intensifies warm

body colours and makes surfaces appear naturally rich and colourful. And last but not least BeCool intensifies cooler body colours.

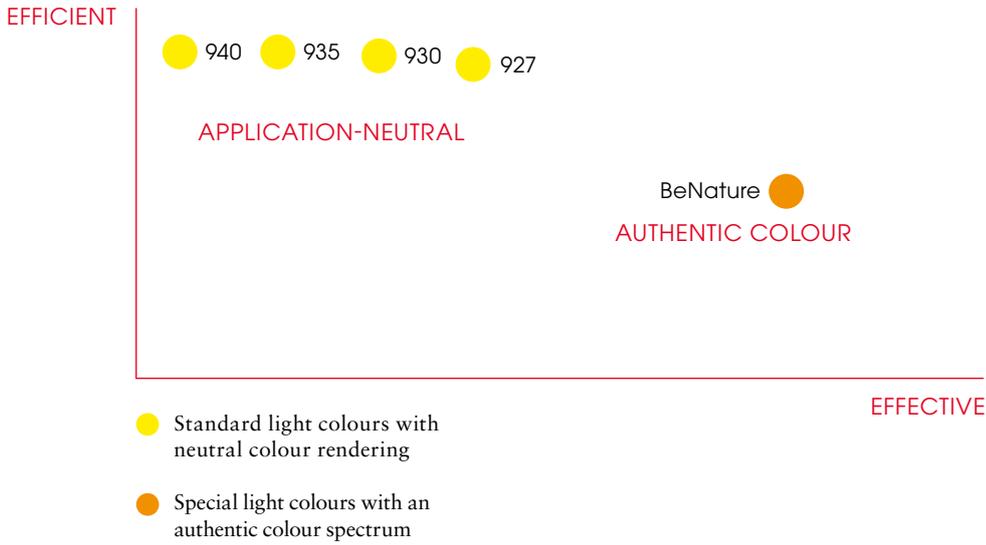

This means that no less than 5 LED light colours are available for the SX series, making it a professional instrument that enables a customised and harmonious light balance to be developed for many retail projects, brands and salesroom situations.

The light spectrum

Visible light is the small portion of electromagnetic radiation that the human eye is able to see without technical aids.

Light spectrums and power ratings

The selection of the right light spectrum is always a balancing act between maximum efficiency and optimum colour effect.

OVERVIEW OF LUMINAIRE LUMINOUS FLUXES

LUMEN (LM)	0	1,000	2,000	3,000
927		440 lm	1,590 lm	
930		450 lm	1,620 lm	
935		480 lm	1,730 lm	
940		490 lm	1,760 lm	
BeNature	240 lm	710 lm		

SX lighting technology

UNCOMPROMISING QUALITY ENGINEERING.

The lighting technology of the SX series is based on developments by the renowned Bartenbach light laboratory. The cumulus-shaped arrangement of the free-form surfaces produces an extremely homogeneous light cone.

There is multiple overlay of the beam of light. Highly specular micro-facets reduce scattered light to a minimum.

The result: pure light!

Patented reflector technology

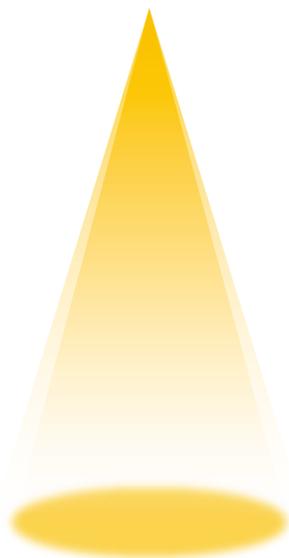

MULTIFACETED IN EVERY DETAIL.

The precise light channelling of the miniaturised RMJ reflectors – developed by the renowned Bartenbach planning office – opens up endless possible applications and produces brilliant light in offices and salesrooms as well as creating emotional lighting atmospheres in cafés, restaurants and hotels.

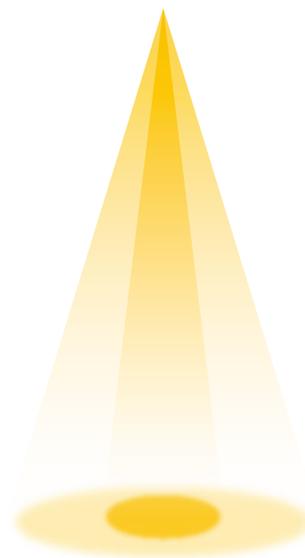

CONVINCING ARGUMENTS

- Excellent glare control
- Homogeneous und structure-free light cone
- Light projection flush with the ceiling
- Highly efficient light distributions
- No stray light
- Precise cutoff
- Top surface quality
- Low luminances

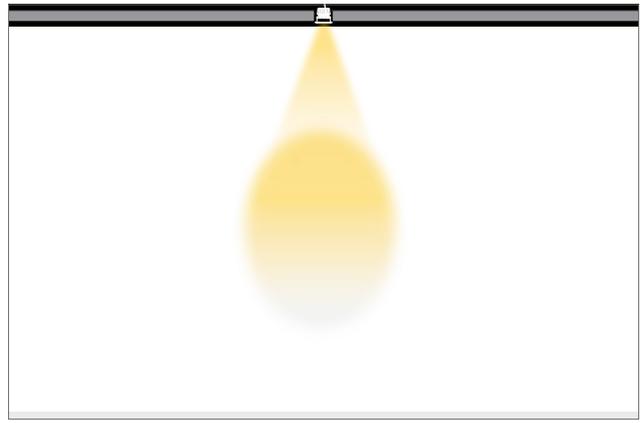

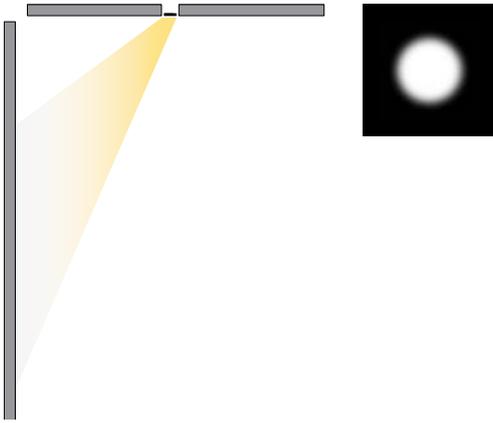

BARTENBACH REFLECTOR TECHNOLOGY

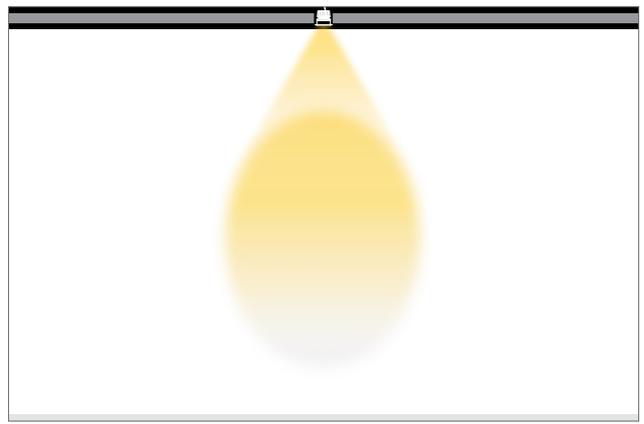

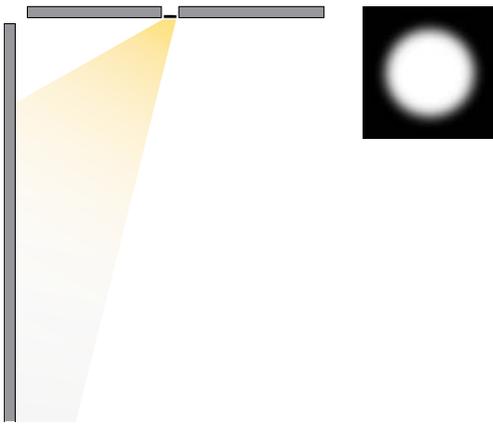

CONVENTIONAL REFLECTOR TECHNOLOGY

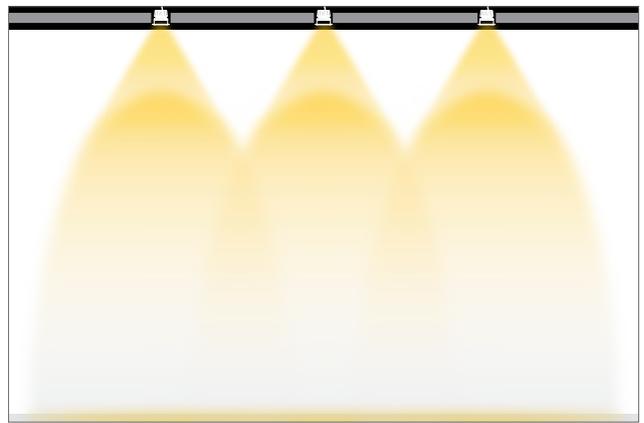

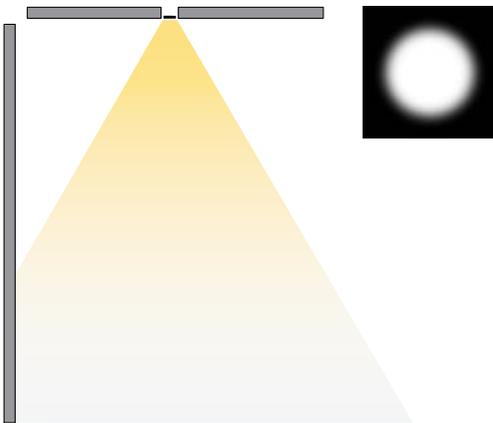

REFLECTOR FLOOD

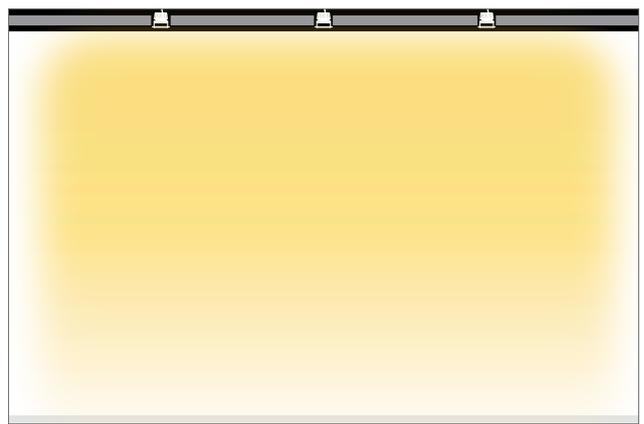

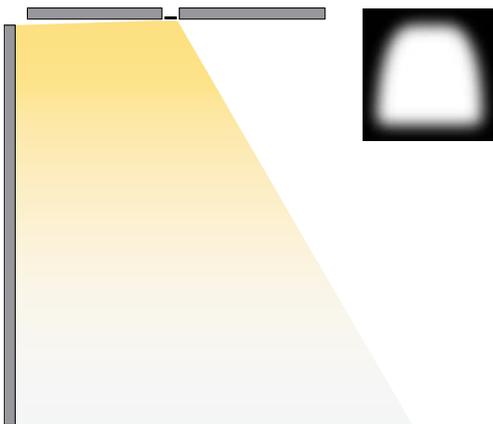

REFLECTOR WIDEFLOOD

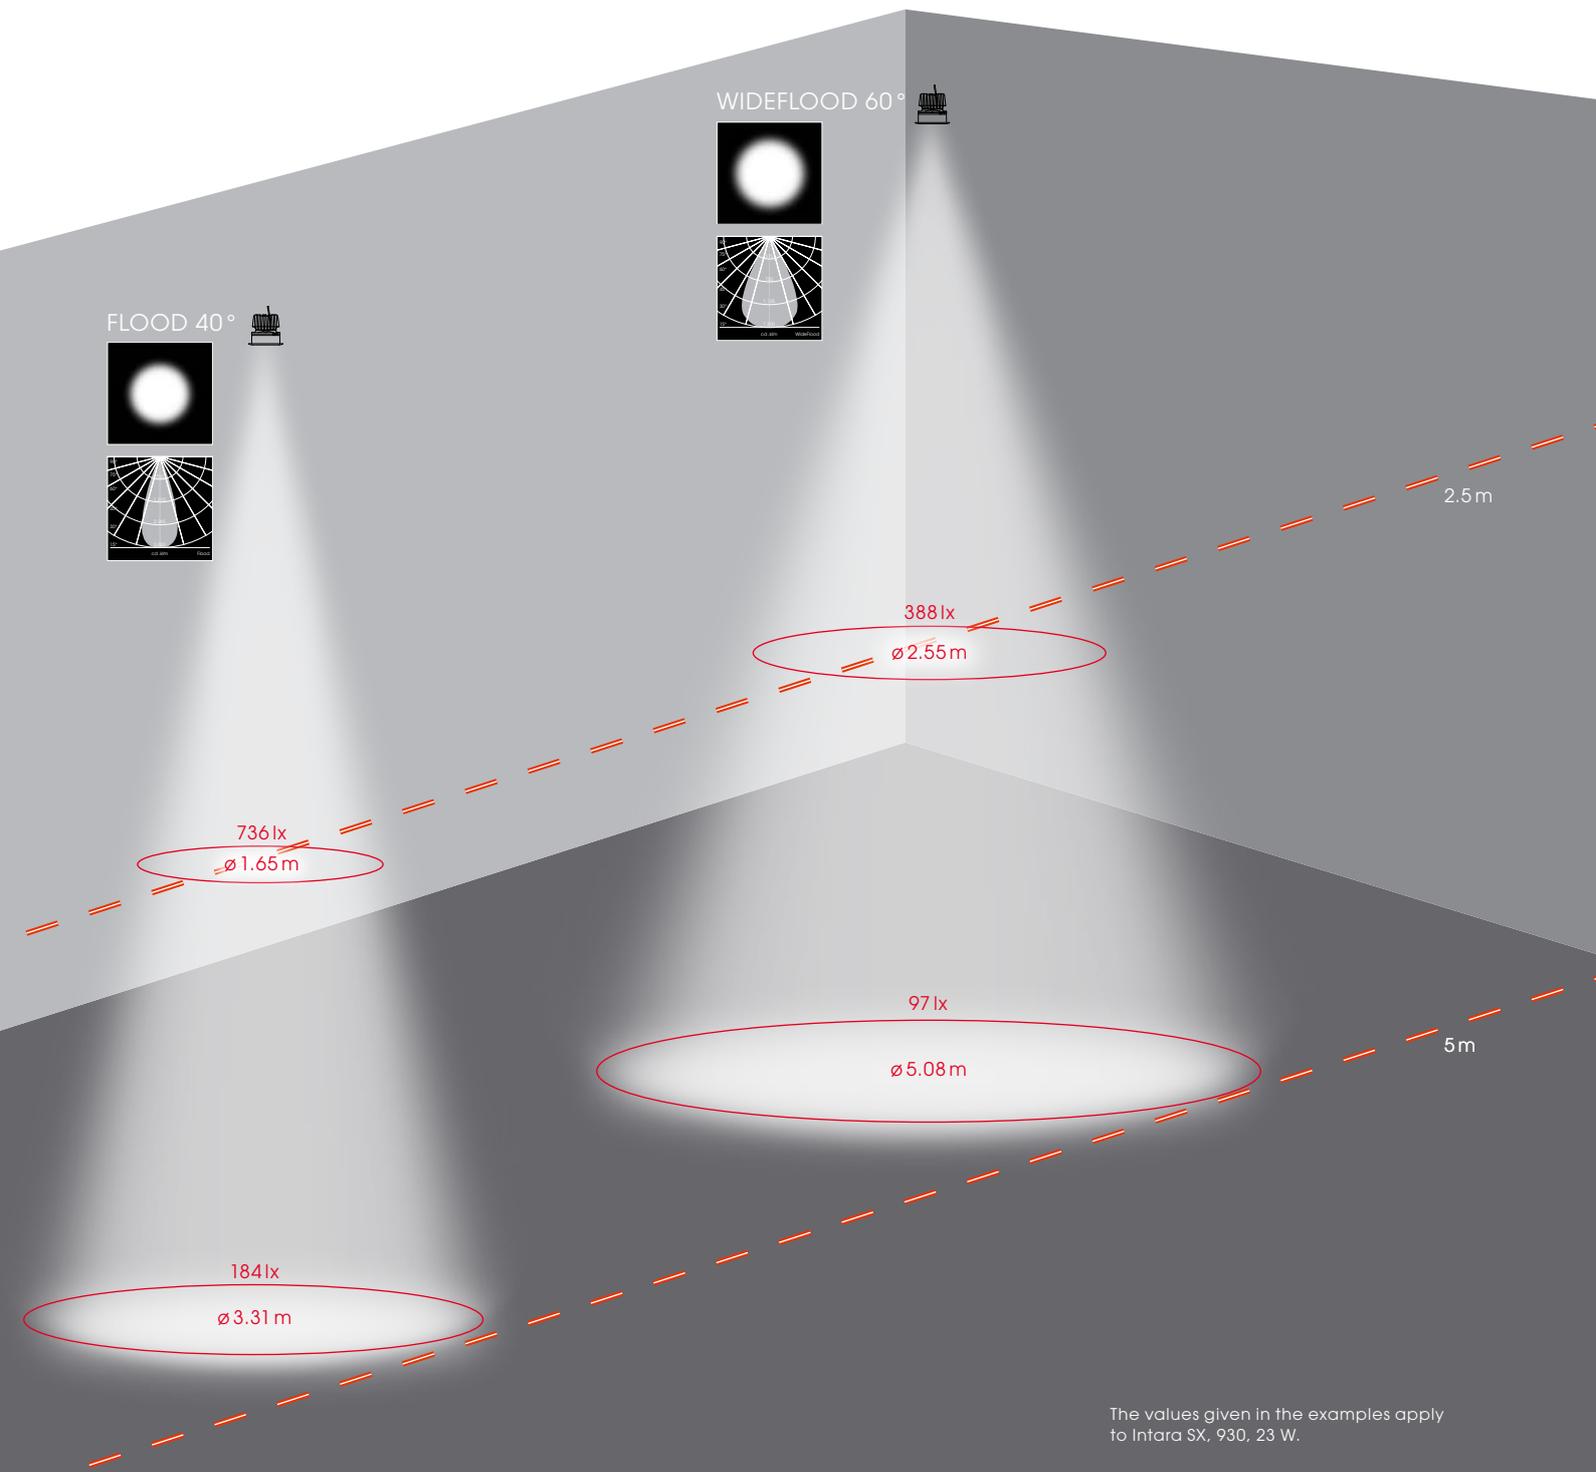

REFLECTOR DOWNLIGHT

REFLECTOR WALLWASH

Unique light channelling

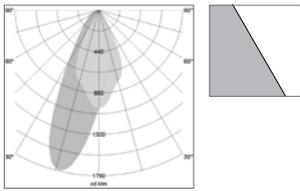

The beam angle defines the diameter of the light cone. With a rotation-symmetrical reflector the diameter of the light cone increases proportionally with the distance, while the illuminance decreases with the square of the distance.

Vertical light distribution

935 . 23 W . 1,730 lm . 75 lm/W

PROPERTIES

- Light projection flush with the ceiling
- Homogeneous illumination of the entire wall surface
- Soft transitions in lateral beam direction
- No visible edge
- Wide luminaire spacings possible
- Perfect visual conditions

A ratio of 3:1 to 5:1 between the height of the wall and the distance of the luminaire from the wall (H/X) is recommended to illuminate a wall or vertical surface very uniformly.

The distance between the luminaires must be less than twice the distance from the wall to achieve an appropriate overlap of light and ensure excellent homogeneity.

927

Colour code

The warm white LED spectrum of the standard light colour is ideal for illuminating goods and product types with warm colours and creating a harmonious atmosphere. The very good colour rendering gives the surfaces a high-quality appearance and even the smallest colour nuances are clearly apparent.

BeNature

Colour spectrum

BeNature is an innovative, cross-application light colour with a correlated colour temperature of 3.000 K, i.e. in the warm white spectrum. The colour rendering index Ra is an excellent 97 which provides for extremely authentic colour rendering and a natural room atmosphere that promotes the well-being of the people there.

BeNature – the new naturalness of artificial light.

BeNature is ideal for use wherever excellent colour vision with clear colour differentiation is desired or even essential, where the surroundings are colourful or decorations and collections change in different colour combinations depending on the season.

Lighting concepts that combine diffuse general lighting with accent lighting or that aim to create a natural lighting atmosphere on account of a lack of daylight also benefit hugely from BeNature.

BÄRO – Your lighting partner right from the start

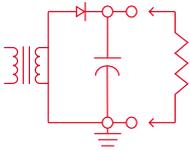

> ADVICE Discover the potential.

A fundamental aspect of our advice is to convey to all those involved in the project the huge potential and the many nuanced possibilities of expression offered by the medium light today thanks to LED technology. Talk to our lighting consultants and find out about the impact that BÄRO products can have in your store – not just in view of effectiveness and efficiency, but also and especially in terms of the emotionality of light.

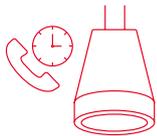

> PLANNING Light that suits you.

Light can be designed in many different qualities and dimensions. Sophisticated light planning not only supports the dramaturgy of the shopping experience; it also allows the lighting to be perfectly tailored to the different visual tasks and product groups. We are committed to finding a customised, expressive light balance for every concept – through the interplay of light distribution and light channelling, light intensities and light colours.

> INSTALLATION On site together.

Careful and professional installation is just as important as effective and creative lighting planning. BÄRO supports you in the installation and alignment of luminaires on site – so that your customised lighting concept rapidly takes shape and unforeseen issues are quickly resolved. In this way you can be sure that the lighting is perfectly focused on the room and the products.

> SUPPORT Long-term cooperation.

Our products boast long-lasting quality and functionality. Nonetheless, our service does not end when your lighting system is put into operation. BÄRO is available to answer your questions and provide services even after completion of the project.

> LEASING Efficient lighting. Financed effectively.

Customised financing for a customised lighting concept. Whether you are a retailer or a retail brand, we will be pleased to advise you on a leasing concept that suits your specific needs. Together we will draw up a contract that caters to your wishes and the needs of your company. Contact us. We're pleased to assist you.
